Parameters

Type	Name	Description	Schema	Default
Body	**body** *optional*		string	

Responses

HTTP Code	Description	Schema
200	successful operation	string

/configsettings

```
GET /gobii/v1/configsettings
```

Description

Provides generic configuration information about the GOBii instance

Responses

HTTP Code	Description	Schema
200	successful operation	PayloadEnvelopeConfigSettingsDTO

Definitions

AnalysisDTO

Name	Description	Schema
header *optional*		Header
payload *optional*		PayloadAnalysisDTO

ConfigSettingsDTO

Name	Description	Schema
allowedProcessTypes *optional*		< enum (CREATE, READ, UPDATE, DELETE, NONE) > array
id *optional*		integer(int32)
maxUploadSizeMbytes *optional*		integer(int32)
serverCapabilities *optional*		< string, boolean > map
serverConfigs *optional*		< string, ServerConfig > map

EntityPropertyDTO

Name	Description	Schema
entityIdId *optional*		integer(int32)
propertyId *optional*		integer(int32)
propertyName *optional*		string
propertyValue *optional*		string

Header

Name	Description	Schema
cropType *optional*		string
dtoHeaderAuth *optional*		HeaderAuth
gobiiProcessType *optional*		enum (CREATE, READ, UPDATE, DELETE, NONE)
gobiiVersion *optional*		string
pagination *optional*		Pagination
status *optional*		Status

HeaderAuth

Name	Description	Schema
gobiiCropType *optional*		string
password *optional*		string
token *optional*		string
userName *optional*		string

HeaderStatusMessage

Name	Description	Schema
gobiiStatusLevel *optional*		enum (ERROR, VALIDATION, WARNING, INFO, OK)

Name	Description	Schema
gobiiValidatio nStatusType *optional*		enum (NONE, UNKNOWN, VALIDATION_COMP OUND_UNIQUE, VALIDATION_NOT_U NIQUE, NONEXISTENT_FK_E NTITY, BAD_REQUEST, MISSING_REQUIRED _VALUE, ENTITY_DOES_NOT_ EXIST, ENTITY_ALREADY_E XISTS, UNKNOWN_ENUM_ VALUE)
message *optional*		string

Link

Name	Description	Schema
description *optional*		string
href *optional*		string
methods *optional*		< enum (GET, POST, PUT, PATCH, DELETE, OPTIONS) > array

LinkCollection

Name	Description	Schema
exploreLinksP erDataItem *optional*		< < Link > array > array
linksPerDataIt em *optional*		< Link > array

Pagination

Name	Description	Schema
currentPage *optional*		integer(int32)
pageSize *optional*		integer(int32)
pagedQueryId *optional*		string
queryTime *optional*		string(date-time)
totalPages *optional*		integer(int32)

PayloadAnalysisDTO

Name	Description	Schema
data *optional*		< AnalysisDTO > array
linkCollection *optional*		LinkCollection

PayloadConfigSettingsDTO

Name	Description	Schema
data *optional*		< ConfigSettingsDTO > array
linkCollection *optional*		LinkCollection

PayloadEnvelopeConfigSettingsDTO

Name	Description	Schema
header *optional*		Header
payload *optional*		PayloadConfigSettin gsDTO

ServerConfig

Name	Description	Schema
confidentialit yNotice *optional*		string

Name	Description	Schema
contextRoot *optional*		string
domain *optional*		string
fileLocations *optional*		< string, string > map
gobiiCropType *optional*		string
port *optional*		integer(int32)

Status

Name	Description	Schema
statusMessages *optional*		< HeaderStatusMessage > array
statusMessagesByCode *optional*		< string, string > map
succeeded *optional*	**Default** : false	boolean
